Confidentiality Notice

This Investment Memorandum has been prepared solely for the purpose of facilitating discussions with HLP regarding a potential strategic development partnership and equity investment.

The information contained within this document is commercially sensitive and confidential. It should not be copied, distributed or disclosed to any third party without the prior written consent of the author.

The financial projections, strategic plans and operational assumptions contained within this memorandum are management forecasts prepared using reasonable commercial assumptions and are intended to illustrate the proposed growth strategy. They should not be interpreted as guarantees of future performance.

Throughout this document the names **Mortgage Hub**, **Mortgage Academy** and **Mortgage Hub Group** are used as temporary working titles only. The intended customer-facing brands remain subject to intellectual property protection and trademark registration. The investment proposition described within this document is independent of the final branding.

Technology philosophy: Technology within Mortgage Hub is designed to augment professional advice, not replace it. Any future expansion of AI capability will be implemented in line with applicable regulation, customer expectations and appropriate human oversight.

--------------------------------------	-----

Executive Summary

Building the Next Generation Mortgage Distribution Platform

Mortgage Hub has been established to create a modern, technology-enabled mortgage distribution platform designed around adviser productivity, customer experience and sustainable long-term growth.

The proposition combines three complementary capabilities:

- A scalable self-employed mortgage and protection business.
- **Mortgage Academy**, providing structured adviser recruitment, development and leadership capability.
- A proprietary technology platform integrating artificial intelligence, workflow automation and digital customer engagement.

Unlike many traditional mortgage businesses, Mortgage Hub has been designed from inception as an **operating platform** rather than simply another brokerage. Technology, people and process have been integrated to improve adviser productivity, reduce administration and create a business capable of significant scale without proportional increases in management overhead.

The initial operating model has been intentionally structured to operate as an **Appointed Representative within the HLP network**, leveraging HLP's established compliance framework and governance infrastructure during the early stages of growth.

Combining new mortgage income, a compounding renewal-income portfolio and Mortgage Academy, management projects total EBITDA of approximately **£700,000 by Year 5**, rising to approximately **£2.3 million by Year 10** as the recurring-revenue portfolio matures and operating leverage increases. (Year 5–10 figures are management projections extending the base forecast; renewal figures are drawn directly from the recurring-revenue model.)

A Different Approach to Mortgage Advice

The mortgage advice market is evolving rapidly. Customers increasingly expect digital engagement, faster communication and greater transparency while continuing to value trusted professional advice for one of the most important financial decisions they will make.

At the same time, advisers face growing administrative demands, fragmented technology and increasing regulatory expectations that reduce the time available to advise customers.

Mortgage Hub has been designed to address these challenges by combining experienced advisers with intelligent technology, structured development and operational excellence. **The objective is not to replace advisers with technology — it is to enable advisers to spend more time advising customers** by removing unnecessary administrative activity.

Strategic intent: Mortgage Hub is not seeking to change HLP — it is seeking to become an innovation partner that strengthens HLP's future capability.

Artificial Intelligence & Technology Strategy

A key differentiator within the Mortgage Hub proposition is **Susan**, an AI-powered digital colleague designed to support customers and advisers throughout the mortgage journey.

Susan initially operates as an intelligent administrative assistant, undertaking activities that traditionally consume significant adviser time:

- Welcoming new customers and conducting the initial fact-find (voice or typed chat).
- Gathering customer information and scheduling appointments.
- Responding to routine customer enquiries and providing application progress updates.
- Integrated telephony with call recording, transcription and AI summaries **LIVE**

SUSAN — CAPABILITY ROADMAP

PHASE 1 · LIVE

Administrative colleague

- Welcome & fact-find
- Voice & typed chat
- Appointment booking
- SMS confirmations
- Progress updates

PHASE 2 · IN DEVELOPMENT

Adviser support

- Integrated telephony
- Call transcription & AI summary
- Document intelligence
- Workflow management
- Case preparation

FUTURE VISION

Strategic capability

- Open Banking integration
- ID verification
- Affordability pre-assessment
- Payment links
- Quality assurance

Technology Architecture

The platform has been built as a single operating architecture integrating the following capabilities:

Capability	Status	Description
Customer Relationship Management	LIVE	Tabbed customer profiles, contact sync, journey milestones, audit timeline
Customer Portal	LIVE	Digital onboarding, fact-find, booking, hub and refer-a-friend
Susan AI	LIVE	Voice & typed fact-find, AI summaries, administrative engagement
Introducer Portal	LIVE	Referral links, portal booking, commission tracking, journey visibility
Workflow Automation	LIVE	SMS/email confirmations, milestone notifications, needs-attention alerts
Telephony Integration	LIVE	Browser softphone, recording, transcription, voicemail
Commission & Finance	LIVE	Fee ledger, commission mgmt, audit history, Excel/PDF exports
Admin & Permissions	LIVE	Owner/supervisor/general hierarchy, granular permissions, admin invites
Open Banking	ROADMAP	Automated income and affordability data collection
Identity Verification	ROADMAP	Built-in digital ID checks linked to journey milestones
Document Intelligence	ROADMAP	AI scanning of payslips, bank statements and uploads
Payment Links	ROADMAP	Secure online fee collection tracked against cases
HLP System Integration	PLANNED	Aligned case coding, reporting structures and case transfer
Data Warehouse & BI	ROADMAP	Management information, performance dashboards, KPI scorecard

Strategic Partnership with HLP

This proposal is not simply seeking a network appointment. It is an invitation for HLP to become a **strategic development partner and equity investor** in a business designed to create long-term enterprise value.

Mortgage Hub has been intentionally designed to complement HLP's existing strengths rather than replicate them. The technology platform will integrate with HLP's operational environment through aligned case coding, compatible reporting structures and consistent financial data architecture.

Phased Governance Model

Responsibility Separation

Mortgage Hub

- Recruitment & customer acquisition
- Technology & marketing
- Adviser productivity & Academy
- Commercial performance & customer experience

HLP

- Regulatory oversight & compliance supervision
- Governance & approved advice framework
- Network standards & regulatory assurance

Founder

Peter Mabbott — Founder & Managing Director

Peter Mabbott brings more than **28 years' financial services experience** spanning retail banking, mortgage distribution, intermediary services and executive leadership. Having held senior leadership positions within one of the UK's largest banking groups and one of the UK's largest mortgage distribution businesses, Peter has built extensive expertise in commercial leadership, business transformation, adviser development, technology innovation and operational excellence. Mortgage Hub represents the culmination of this experience, bringing together technology, adviser development and scalable operating practices to create a next-generation mortgage distribution platform.

The Mortgage Hub Operating Model

A business designed for scale — maximising the time advisers spend advising customers while technology undertakes administrative activity wherever possible.

THE THREE ENGINES OF GROWTH

Engine One — Distribution

The regulated mortgage & protection business.

- Customer acquisition
- Introducer relationships
- Adviser productivity
- Commercial growth

Engine Two — Talent

Mortgage Academy — the long-term talent engine.

- Recruitment & CAS prep
- Leadership development
- CPD & coaching
- HLP ecosystem pipeline

Engine Three — Technology

Proprietary AI-enabled operating platform.

- Susan AI
- CRM & customer portal
- Telephony & automation
- Business intelligence

Business Structure

The initial structure is intentionally lean:

Operational support functions will only be introduced as adviser numbers justify additional investment, maximising operational leverage during the early stages of growth.

Adviser & Customer Proposition

The Adviser Proposition

Designed for ambitious self-employed advisers who want to build successful long-term businesses:

- Competitive commercial arrangements
- Modern technology & AI-enabled administration
- Structured coaching & Mortgage Academy
- Digital customer engagement
- Clear career progression & leadership opportunities

The Customer Proposition

Digital convenience without sacrificing professional advice:

- Digital onboarding & AI-supported engagement
- Voice or typed fact-find with Susan
- Fast document collection & transparent communication
- Human advisers throughout the advice journey
- Secure customer portal & progress updates

Adviser Development Journey

ADVISER JOURNEY

Stage 1 — Recruitment · Business planning · Onboarding · Compliance

Stage 2 — Supported launch · Customer acquisition · Coaching

Stage 3 — High performer · Mentoring · Leadership · Academy

Susan — AI Digital Colleague

Susan has not been developed to provide regulated mortgage advice. She improves customer experience and adviser productivity by undertaking structured administrative activities under appropriate human oversight.

SUSAN — CAPABILITY ROADMAP

PHASE 1 · LIVE

Administrative colleague

- Welcome & fact-find
- Voice & typed chat
- Appointment booking
- SMS confirmations
- Progress updates

PHASE 2 · IN DEVELOPMENT

Adviser support

- Integrated telephony
- Call transcription & AI summary
- Document intelligence
- Workflow management
- Case preparation

FUTURE VISION

Strategic capability

- Open Banking integration
- ID verification
- Affordability pre-assessment
- Payment links
- Quality assurance

Mortgage Academy

The long-term talent engine supporting both Mortgage Hub and, over time, the wider HLP ecosystem.

Unlike traditional training functions, Mortgage Academy combines technical knowledge with practical business development, technology adoption and commercial capability:

- Adviser recruitment & structured onboarding
- Competent Adviser Status preparation
- Sales excellence & customer relationship management
- Leadership development & AI adoption
- Business growth coaching & HLP platform training

As careers develop, advisers may continue growing within Mortgage Hub, become senior advisers, move into coaching, join leadership roles, or progress into wider opportunities within HLP.

Integration with HLP

Mortgage Hub has been designed from inception to complement HLP rather than operate independently. The technology platform will align with HLP's operational environment through:

- Standardised case coding & automated case transfer
- Common financial reporting structures & reconciliation
- Shared compliance data & management reporting
- Performance dashboards & operational insight

Value Created for HLP

Dimension	Strategic Value
Distribution	A scalable, technology-enabled advice business capable of sustainable growth
Talent	Structured adviser recruitment and development supporting the HLP ecosystem
Technology	A modern AI-enabled operating platform creating wider innovation opportunities
Enterprise Value	Participation in long-term shareholder value through strategic equity investment

Commercial Strategy & Financial Proposition

A scalable, technology-enabled operating platform capable of delivering long-term shareholder value while maintaining excellent customer outcomes.

All revenue shown represents **new net income received from the network (HLP)**, after the network has deducted applicable charges and fees. These forecasts reflect **new mortgage income only** and exclude renewal / recurring income, which is shown separately in the Recurring Revenue section to avoid double-counting. The business is expected to operate at a planned loss during the initial development phase while investment is made in technology, recruitment, Mortgage Academy and organisational capability.

New Mortgage Income — Revenue Assumptions

Each fully trading adviser is expected to complete approximately **60 customer acquisitions annually**, producing average annual **new mortgage income** (net from the network, HLP) of:

Revenue Source	Annual New Income
Procuration Fees	£33,000
Broker Fees	£8,000
Protection & General Insurance	£19,000
Total New Mortgage Income	£60,000

Adviser Commercial Model

Commercial Arrangement	Typical Range
Adviser Commission	40–60%
Introducer Commission	10–25%
Maximum Combined Pay-away	85%
Technology & Business Services	£150 per month

Growth Assumptions

Year	Founder	Trading Advisers	Onboarding	Academy
Year 1	Trading	1	5	Internal
Year 2	Trading	8	5	Internal
Year 3	Strategic Leadership	20	10	Standalone
Year 4	Strategic Leadership	35	10	Standalone

Management Forecast

Mortgage Hub

Figures below reflect **new mortgage income only** (net from the network, HLP) and exclude renewal / recurring income, which is forecast separately in the Recurring Revenue section.

	Year 1	Year 2	Year 3	Year 4
Revenue (new mortgage income, net from network HLP)	£60,000	£480,000	£1,200,000	£2,100,000
Adviser Commission	(£30,000)	(£240,000)	(£600,000)	(£1,050,000)
Introducer Commission	—	(£96,000)	(£240,000)	(£400,000)
Gross Profit	£30,000	£144,000	£360,000	£650,000
Salaries	(£140,000)	(£160,000)	(£110,000)	(£200,000)
Training Investment	—	—	(£40,000)	(£50,000)
EBITDAR	(£110,000)	(£16,000)	£210,000	£400,000

Mortgage Academy

	Year 3	Year 4
Revenue	£104,000	£200,000
Salaries	(£50,000)	(£90,000)
Operating Costs	(£20,000)	(£40,000)
EBITDAR	£34,000	£70,000

Organisational Growth

Stage	Structure
Launch	Founder, Trainer, Technology Platform
8 advisers	Lean central team
20 advisers	Mortgage Academy operating independently
25 advisers	First Sales Manager
35 advisers	Sales Manager and Administrator
£2m+ turnover	Business Development Manager
Every +25 advisers	Additional Sales Manager

Adviser Projected Income

An illustrative earnings journey for a single adviser — showing how rising case sizes, growing customer acquisition and the emergence of renewal income build a compounding personal income stream.

The illustration assumes the standard commercial split of **50% to the adviser** and a **20% introducer share**. Of the annual acquisitions, **30 are self-introduced** (the adviser's own customers, with no external introducer) — so on those cases the 20% is **not paid away and is retained by the adviser**, on top of their 50%. The external introducer payment therefore applies only to genuinely introducer-sourced customers. Renewal commission is the adviser's 50% share of £400 renewal income on retained customers.

Year	Case size	Acq.	Self-intro	Adviser 50%	Retained 20% (self-intro)	Renewal comm.	Total adviser income	External introducer paid
Year 1	£1,000	60	30	£30,000	£6,000	—	£36,000	£6,000
Year 2	£1,200	70	30	£42,000	£7,200	—	£49,200	£9,600
Year 3	£1,500	80	30	£60,000	£9,000	£4,000	£73,000	£15,000

Total adviser income = Adviser 50% commission + retained 20% on self-introduced customers + renewal commission. The final column is paid to external introducers on introducer-sourced customers only and is not deducted from adviser income.

A growth story, not a snapshot

The value of the Mortgage Hub model to an adviser is not a single year's earnings — it is the trajectory:

- **Self-introduced economics.** When an adviser brings their own customer, there is no external introducer to pay — so the adviser keeps their 50% *and* the 20% introducer share. For an adviser self-introducing 30 customers a year this adds **£6,000–£9,000** of retained income annually.
- **Rising case values.** Average case size grows from £1,000 to £1,500 as advisers deepen protection and general insurance attachment alongside each mortgage.
- **Growing acquisition.** Supported by the partnership network, refer-a-friend and Susan-enabled administration, annual acquisitions rise from 60 to 80 while the adviser's own self-introduced business stays a dependable core.
- **Emerging renewal income.** From Year 3 the adviser begins to earn renewal commission (£4,000) on retained customers — income earned on relationships already won, at a fraction of the effort of new business.

Total adviser income grows from **£36,000 in Year 1 to £73,000 by Year 3** — materially boosted by the self-introduced 20% the adviser retains — and because renewal income compounds year on year as the customer portfolio matures, the adviser's earnings continue to build well beyond the period shown.

Why this matters: advisers who self-generate keep the full economics of their own customers — their 50% plus the 20% that would otherwise go to an introducer — creating a powerful incentive to build a personal client base. For the firm and its investors, the same dynamic drives rising revenue per adviser and a compounding renewal-income portfolio at the firm level.

Illustrative figures for a single representative adviser; actual earnings vary with productivity, case mix and lead source. Consistent with firm-level assumptions elsewhere in this document.

Strategic Partnerships & Scalable Customer Acquisition

Building a predictable, scalable and diversified customer acquisition engine through long-term strategic partnerships with organisations that regularly advise customers during key property and financial decisions.

Rather than relying on purchased leads, Mortgage Hub will establish an ecosystem of professional partners who benefit from introducing customers into the platform.

Target Partnership Sectors

- Independent estate agencies · Residential property developers
- Solicitors & conveyancing firms · Accountancy & tax advisory practices
- Independent financial advisers · Wealth management firms
- Employee benefit providers · Property investment specialists

Addressable Market

Sector	Estimated UK Businesses
Independent estate agencies	11,000
Residential property developers	9,000
Solicitors & conveyancing firms	9,500
Accountancy & tax advisory firms	37,000
Total Addressable Market	66,500

Approximately **30% (~20,000)** currently operate without an established mortgage referral relationship — immediate partnership opportunities. The remaining **70% (~46,500)** represent competitive conversion opportunities where Mortgage Hub differentiates through technology, transparency, renewal income participation and dedicated relationship management.

Customer acquisition will be diversified across strategic partnerships, refer-a-friend, existing customer referrals, self-generated business, digital marketing, corporate partnerships and local networking.

Recurring Revenue & Enterprise Value

Building long-term shareholder value through predictable recurring revenue from retained customer relationships.

Whilst new mortgage completions generate immediate income, long-term enterprise value is created by retaining customers through future mortgage events, product transfers and remortgages.

Management Assumptions

- Average mortgage completions per adviser: **60 per annum**
- Customer retention: **60%**
- Average renewal income: **£400** per retained customer
- Adviser growth increasing by ten advisers annually from Year 5

Illustrative Recurring Revenue Forecast

Year	Renewal Income	Adviser (50%)	Introducer (20%)	Admin	Forecast EBITDAR
3	£14,400	£7,200	£2,880	£1,440 (10%)	£2,880
4	£129,600	£64,800	£25,920	£12,960 (10%)	£25,920
5	£417,600	£208,800	£83,520	£41,760 (10%)	£83,520
6	£921,600	£460,800	£184,320	£55,296 (6%)	£221,184
7	£1,569,600	£784,800	£313,920	£94,176 (6%)	£376,704
8	£2,217,600	£1,108,800	£443,520	£133,056 (6%)	£532,224
9	£3,009,600	£1,504,800	£601,920	£180,576 (6%)	£722,304
10	£3,945,600	£1,972,800	£789,120	£236,736 (6%)	£946,944

By Year 10 the recurring income portfolio is projected to generate almost **£4 million** of annual recurring revenue, producing forecast EBITDAR approaching **£1 million** from this income stream alone — a significant driver of long-term shareholder value.

Funding Requirement & Use of Funds

Strategic investment to accelerate development during the establishment phase — not to support an unsustainable business model.

Investment will support

Technology Susan AI, customer portal, workflow automation, telephony and HLP integration.	Working Capital Planned operating losses during Years 1–2 while the adviser population scales.	Mortgage Academy Recruitment, structured onboarding and leadership capability.
Recruitment Attraction and onboarding of experienced self-employed advisers.	Marketing Brand development, digital marketing and customer acquisition.	Infrastructure Systems, licences, professional services and business support.

Value Creation Plan

HLP's equity stake becomes more valuable over time through multiple compounding value drivers:

Value Driver	Mechanism	Timeline
Adviser distribution	Scalable self-employed model with technology leverage	Years 1–4
Technology platform	Susan AI, CRM, telephony and automation reducing cost-to-serve	Ongoing
Mortgage Academy	Talent pipeline for Mortgage Hub and HLP ecosystem	Year 3+
Partnership network	66,500-addressable-market acquisition engine	Years 2–5
Recurring revenue	Compounding renewal income portfolio	Year 3–10
AI capability	Progressive Susan phases creating competitive moat	Years 1–5+
Adjacent services	Optional expansion: licensing, acquisitions, network services	Year 5+

Key Performance Indicators

Management success measured through a balanced scorecard: commercial (revenue per adviser, protection penetration), operational (journey times, AI utilisation), people (recruitment, retention, Academy completion) and customer (satisfaction, referral rates, digital engagement).

Strategic Roadmap

Delivering the vision through clearly defined phases of development.

PHASE 1 · YEARS 1-2

Foundation

- Launch as HLP Appointed Representative
- Deploy Susan Phase 1
- Recruit first adviser cohort
- Establish Mortgage Academy
- Build introducer relationships
- Validate commercial proposition

Target: 8 advisers trading, 5 onboarding

PHASE 2 · YEARS 3-4

Operational Scale

- Academy as standalone business
- First Sales Manager appointed
- Susan Phase 2 & telephony
- Positive operating profitability
- Strengthen HLP integration

Target: 35 advisers trading

PHASE 3 · YEAR 5+

Strategic Growth

- Academy services across HLP
- Enhanced AI & document intelligence
- Additional adviser services
- Technology licensing
- Selective acquisitions

Target: National growth platform

Planned Milestones

Year	Key Milestones
Year 1	Launch · Susan Phase 1 · First adviser cohort · Academy established · Platform validated
Year 2	8 advisers trading · Expand introducer network · Refine customer journey · AI investment
Year 3	20 advisers · Academy standalone · Susan Phase 2 · Profitability · HLP integration
Year 4	35 advisers · Sales Manager · Administrator · BDM (subject to turnover) · Academy for HLP

Risk Management

Risk	Mitigation
Adviser recruitment	Mortgage Academy creates structured recruitment and development pipeline
Regulatory change	Operate within HLP governance framework; adapt processes as requirements evolve
Technology delivery	Phased implementation with testing before wider deployment
AI adoption	Susan initially supports administrative activities only; future capability introduced where compliant
Customer acquisition	Diversified lead generation through partnerships, digital marketing and adviser-led BD
Operational scalability	Technology and automation reduce reliance on increasing management overheads

Why HLP? Why Invest Now?

Mortgage Hub is at the beginning of its development journey. Investment at this stage provides the opportunity to influence strategy, shape the operating model and participate in future value creation from inception.

Benefits to HLP

- Participate in equity value creation
- Access modern technology platform
- Develop future advisers via Academy
- Improve productivity across network
- Strengthen long-term recruitment

The Proposition

- Experienced founder (28+ years)
- Clearly defined commercial model
- Scalable technology strategy
- Structured adviser development
- AI roadmap centred on Susan
- Disciplined operating model

Conclusion

Mortgage Hub has not been conceived as a traditional mortgage brokerage. It has been designed as a scalable operating platform that combines experienced advisers, intelligent technology and structured talent development.

The partnership proposed with HLP is intended to create mutual value. Mortgage Hub benefits from HLP's governance, regulatory expertise and established market presence. HLP benefits from participation in a business designed around innovation, adviser development and long-term enterprise value.

The investment proposition: Mortgage Hub is seeking a strategic partner rather than a passive investor — a long-term relationship founded on shared values, aligned incentives and a common ambition to build one of the UK's most progressive technology-enabled mortgage distribution platforms.

For almost three decades I have had the privilege of leading teams, transforming businesses and helping customers achieve their financial goals. Mortgage Hub represents the opportunity to bring together everything I have learned into a business designed for the future. I believe HLP is the right organisation to help bring that vision to life.

Peter Mabbott · Founder & Managing Director

Live Platform Capabilities

The Mortgage Hub platform is operational today. The following capabilities are live and demonstrated in the accompanying user guide (Appendix A).

Customer Experience LIVE

- **Susan AI** — spoken fact-find (voice) and typed chat alternative
- **Appointment booking** — self-serve diary with SMS and email confirmation
- **Post-booking choice** — complete fact-find or confirm attendance only
- **Customer hub** — view cases, update contact details and address
- **Refer-a-friend** — personal referral links with admin-configurable limits

Introducer Portal LIVE

- Shareable referral link with automatic attribution
- Portal booking with email + SMS confirmation
- SMS booking links and manual lead logging
- Referral dashboard — journey stage, advisor, days at stage, last contact
- Commission statement with payout dates
- Company code for team onboarding

Advisor Workspace LIVE

- Tabbed customer profile — Contact, Notes & history, Fact find, Journey, CRM
- Needs-attention highlights for call-backs and ready-to-review customers
- Integrated softphone — outbound/inbound calls with recording
- AI call transcription and conversation summaries on customer timeline
- Voicemail capture and transcription
- Contacts tab with mark-contacted workflow (disables once actioned)
- Customer profile introducer attribution — amend/refresh (owner-only)
- Journey milestones with customer SMS on confirmation
- Personal commission statement

Owner & Admin LIVE

- Finance ledger enriched with customer, case ref, receiver and reference
- Commission management, audit history and current arrangements
- Previous rates browse by date range and fee type
- Excel and PDF exports (finance, commission, audit, customers)
- Admin hierarchy — owner, supervisor, general admin with granular permissions
- Admin invite flow and advisor view impersonation
- Manage advisors, introducers, RAF limits and test accounts

Coming Soon ROADMAP

- Document upload & AI scanning · Integrated ID checks
- Open Banking · Payment links · Smarter document workflows
- HLP system integration · Data warehouse & BI dashboards

Appendix A

Mortgage Hub — User Guide & Instruction Manual

Complete guide for customers, introducers, advisors, admin staff and firm owners.
Version 2026

1. Overview & roles

Mortgage Hub is a multi-role platform that prepares customers before their first advisor meeting, tracks introducer referrals, and gives advisors and owners a single workspace for cases, commission, telephony and reporting.

Role	Who	Main purpose
Customer	Homebuyers & remortgagers	Complete fact-find (voice or type), book appointments, manage contact details, refer friends.
Introducer	Estate agents, solicitors, planners	Share referral link, book customers, track journey stage, view commission.
Advisor	Mortgage advisors	Manage customers, CRM, diary, fact-finds, calls, milestones and personal commission.
General admin	Support staff	Operational tasks and reporting within permissions granted by the owner.
Supervisor	Senior admin	Elevated admin able to manage permissions and team, as delegated by the owner.
Owner	Firm principal	Full finance, commission, audit, admin and team management across the firm.

2. Signing in

All users sign in at **m-abbott.co.uk**. Available methods depend on role:

- **Email & password** — standard for advisors, introducers and customers.
- **Google sign-in** — available where configured for customers.
- **SMS one-time code** — customers can sign in with their mobile number.
- **Authenticator app** — advisors and admin staff use two-factor authentication.

Test accounts: Firm owners can provision test accounts (Manage → Test accounts) for training. Test emails bypass SMS verification when configured.

CUSTOMER

3. Customer portal

After sign-in, customers choose how to start: spoken fact-find with Susan, typed chat, or book an appointment immediately.

Three ways to get started

1. **Spoken fact-find** — Susan (AI voice guide) asks each question aloud and listens to answers.
2. **Typed fact-find** — Same questions in a quiet chat; pause and resume any time.
3. **Book an appointment** — Pick an available advisor slot from the diary.

After booking

When a customer books (or is booked by staff/introducer), they receive **SMS and email** confirmation. They can then:

- Complete the spoken fact-find
- Complete the typed fact-find
- **Confirm attendance only** — skip fact-find and just confirm they will attend

Customer hub

Customers can view their cases and update contact details including name, email, phone and address. Changes sync to the advisor CRM automatically.

Refer a friend

Customers receive a personal Refer-a-Friend link. When friends sign up through that link, the referrer is credited. Admin can configure RAF limits in Manage.

Tip: Completing the fact-find before the meeting means the advisor already has an AI summary — the first call starts with context, not basic questions.

INTRODUCER

4. Introducer portal

Introducers refer customers, book appointments on their behalf, and track progress without seeing sensitive fact-find answers.

Referral link

Every introducer has a unique shareable link. Customers who sign up through it are automatically attributed to that introducer.

Book a customer (portal booking)

1. Open the **Book customer** card on your dashboard.
2. Enter customer name, **email** (required) and phone number.
3. Select an advisor and available appointment slot.
4. Submit — the customer receives SMS and email with a link to confirm and choose next steps.

Other introducer tools

- **SMS booking link** — send a personalised link for the customer to pick their own time.
- **Manual lead logging** — record name, phone and notes for telephone enquiries.
- **Company code** — 4-digit code so colleagues join the same introducer company.
- **Referral dashboard** — see name, journey stage, lead source, allocated advisor, days at stage and last contact date.
- **My commission** — view introducer commission entries and payout dates.

Privacy: Introducers see journey stage and contact metadata — not full fact-find answers or financial detail.

ADVISOR

5. Advisor workspace

Advisors manage their customer caseload from a tabbed dashboard with needs-attention highlights on the home screen.

Home screen

- **Needs attention** — customers with pending call-backs or fact-finds ready for review.
- **Customer booking card** — book a new customer or send SMS + email booking link (same as staff/introducer flow).
- **Diary summary** — upcoming appointments at a glance.

Contacts tab

- **Appointments & call-backs** to work through, with lead source and last-contact detail.
- **Mark contacted** — once a contact is actioned the button greys out and disables, so nobody is called twice.
- **Introducer box** — shows the customer’s introducer code and company, with an **Amend** option (permission-controlled) and, for owners, **Refresh commission** to recalculate attribution.

Customer profile (tabs)

Tab	Contents
Contact	Name, email, phone, address — editable; syncs with customer hub.
Notes & history	Advisor notes and full audit timeline (calls, SMS, appointments, milestones).
Fact find	Structured answers and AI-generated summary.
Customer journey	Milestone tracker: appointment seen, ID confirmed, AIP completed.
CRM	Contact card on cases — quick view of customer details linked to the case.

My commission

Advisors view their personal commission statement. Commission is credited when fees are submitted on a case (see Finance section).

6. Calls & telephony

Mortgage Hub includes integrated telephony so advisors can call customers from within the platform, with recordings and AI summaries logged to the customer timeline.

Making & receiving calls

- **Softphone** — advisors call customers directly from the browser; outbound calls are linked to the customer record.
- **Inbound handling** — incoming calls are routed and, when unanswered, captured as voicemail.

Recording, transcription & summaries

- Calls are **recorded** and attached to the phone-call record for the customer.
- **AI transcription** converts the recording to text.
- An **AI summary** of the conversation is written to the customer's Notes & history timeline.
- **Voicemail** messages are transcribed and surfaced for follow-up.

Audit: Every call, recording, transcript and summary is retained on the customer timeline alongside SMS, appointments and milestones — a single, reviewable record.

7. Diary & appointments

Diary

- View upcoming and past appointments and available slots.
- **Amend appointments** — change date/time for an existing booking.
- Book customers directly from the booking card.

Journey milestones

1. **Appointment seen** — customer attended or spoke with advisor.
2. **ID confirmed** — identity documents verified.
3. **AIP completed** — agreement in principle obtained.

Confirming milestones can trigger customer SMS notifications. Log contact attempts and next-contact dates so no customer is forgotten.

8. Commission & finance

How commission works

- When an advisor submits a fee on a case, commission is calculated automatically.
- **Advisor commission** is credited to the advisor's statement.
- **Introducer commission** is credited using the introducer effective at the fee date.
- Payout dates appear on My commission and Commission mgmt.

Commission audit & arrangements

- **Commission audit history** — a combined log of rate changes and introducer amendments, with who/when.
- **Current commission arrangements** — the live rates in force per advisor / introducer role.
- **Previous rates by date range** — browse historic rates filtered by fee type and date range.

Report exports

On Finance, Commission mgmt, My commission and the owner Customers tab, use the export box (bottom-left) to download:

- **Excel (.xlsx)** — including finance audit and rate-history sheets.
- **PDF** — formatted report for printing or filing.

Owner finance tabs

- **Finance** — firm-wide fee ledger, enriched with customer, case ref, receiver and reference.
- **Commission mgmt** — all commission entries across advisors and introducers.
- **My commission** — owner's own advisor commission (if applicable).

Note: Finance tables show the most recent rows with scroll for older entries. Exports include the full dataset.

OWNER / ADMIN

9. Owner & admin tools

Admin hierarchy

Level	Can do
Owner	Everything: finance, commission, audit, grant admin levels, edit all permissions, manage team.
Supervisor	Elevated admin; can edit general-admin permissions and manage team as delegated.
General admin	Operational access limited to the specific permissions granted by the owner/supervisor.

Inviting & managing admins

- **Invite an admin** from the Manage tab — the invitee registers, then the owner assigns supervisor or general-admin access.
- **Admin access panel** — select a registered admin and set their level and granular permissions (e.g. introducer amend, finance, exports).
- "Make supervisor" and "Permissions" controls appear only for those authorised to grant them.

Advisor view tab

Owners and supervisors open the **Advisor view** tab to see any advisor's dashboard — their customers, diary and workload. Exit advisor view to return.

Manage tab

- **Advisors** — invite, suspend, reinstate and delete advisors.
- **Introducers** — manage introducer companies and access.
- **Refer-a-friend limits** — configure RAF bonus rules (compact, scrollable list).
- **Test accounts** — provision or revoke test accounts for training.

Security

Admin and advisor accounts require authenticator-app two-factor authentication. Customer accounts support email, Google or SMS sign-in.

10. Quick reference

Task	Where to go	Role
Start spoken fact-find	Customer home → Talk to Susan	Customer
Book appointment	Customer home → Book a call	Customer
Confirm attendance only	Link in booking SMS/email	Customer
Book customer for someone	Book customer card	Introducer / Advisor
Send SMS booking link	Book customer card → Send link	Introducer / Advisor
Call a customer	Customer profile → Call	Advisor
Read call summary	Customer profile → Notes & history	Advisor
Mark contact as contacted	Contacts tab → Mark contacted	Advisor
Amend introducer	Contacts → Introducer box → Amend	Advisor (permitted)
Amend appointment	Diary → select appointment → Amend	Advisor
Mark journey milestone	Customer profile → Customer journey	Advisor
Check my commission	My commission tab	Advisor / Introducer
View commission audit	Finance → Commission audit history	Owner
Export finance report	Finance tab → Export box (bottom-left)	Owner
Invite an admin	Manage → Invite admin	Owner
Set admin permissions	Admin access panel	Owner / Supervisor
View as advisor	Advisor view tab → select advisor	Owner
Provision test account	Manage → Test accounts	Owner
